# COLLABORATION SOLUTIONS FOR EVERY WORKSPACE

## INTRODUCTION

The workplace has changed. Where once a rarity, hybrid working is now standard for many – a trend set to continue as life goes back to normal.

With the change in scenery comes a change in the way we work. A new era of video conferencing dominance has been ushered in as companies look for ways to stay connected, wherever their people are.

Most of the working world has adjusted to this. And everyone who needs to is now able to work from home, and those who retained a traditional office space have adapted to accommodate video conferencing. But working doesn't always mean working well.

Finding a solid strategy for maintaining in-person level communication standards with employees and contacts in many different locations suddenly became a high priority, posing a particular challenge for those relying solely on the traditional office environment.

Since then, it has never been more crucial for staff to be able to present themselves professionally and collaborate effectively over video – but this can be difficult to achieve without the right tools and support.

That's where Logitech and Ricoh come in.

## WHY LOGITECH AND RICOH?

### logitech®

Logitech is the leading vendor for video conferencing equipment and virtual collaboration solutions – and for good reason. Built on decades of pioneering innovation, no other company understands user needs better, keeping intelligent, thoughtful design at the heart of everything they create. Logitech prides itself on creating products that users love and IT departments trust, with a plug-and-play philosophy that takes the stress out of video conferencing for even the most technophobic member of your team.

### RICOH

Ricoh is a leading global provider of workplace solutions that enable businesses to become more flexible, efficient, and profitable. No matter what industry you work in or where you're based, Ricoh has the expertise and reach to help you achieve your goals. From consultation to set-up and support, it's your one-stop-shop for all things collaboration.

Combined, **Ricoh** and **Logitech** offer crucial simplicity for businesses deploying new video conferencing solutions, and adapting their workplaces for hybrid working.

By partnering with us you're giving your entire workforce access to the best quality products with global round-the-clock support – and an expected return on your investment at a cost-effective price with finance plans to suit your budget.

### LOGITECH AND RICOH ARE UNIQUELY ABLE TO OFFER

- **Scalability** – New starters? Downsizing? Acquisition? Your needs as a business won't always be the same. That's why Ricoh offers the ability to easily scale your set up to suit your needs, including financial plans to get the best out of your budget.
- **Machine and platform agnostic** – Whether you're on Mac or PC, Zoom or Teams, at home or hybrid, Logitech products are designed to work with pretty much anything, with equally outstanding performance across the board.
- **The power of partnership** – As two market-leading businesses, Logitech and Ricoh can offer you the best of both worlds when it comes to product and service – and make it easier and more affordable than competitors can.

## OUR SOLUTIONS FOR YOUR BUSINESS

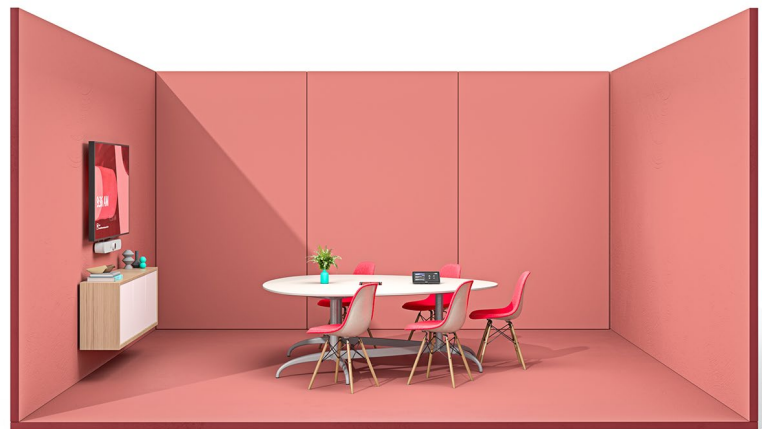

With so much to choose from, identifying which solutions will most benefit your company can be a puzzle – but Logitech and Ricoh have made it simple, with a range of targeted solutions designed specifically for businesses.

For those working in a traditional office environment, it can be helpful to have a dedicated video-enabled area, rather than conducting calls from open working areas.

### WITH LOGITECH AND RICOH, ANY ROOM CAN BE TRANSFORMED INTO A HUB OF DIGITAL COLLABORATION

The **Rally Bar Bundles** come with everything you need to upgrade your video conferencing area, whether you're at home or in the office. The **Rally Bar** and **Rally Bar Mini** are unique all-in-one video bars for mid-size and small rooms that connect via USB to any computer with no additional software needed. They provide cinema quality video and features like optical zoom, AI viewfinder, and motorised pan and tilt.

These team up with **RICOH Meeting Spaces**, a calendar-integrated meeting room controller that allows you to join a meeting with just one touch, and **Swytch**, a laptop link that enables connection between your video conferencing room's display, camera and audio devices, to form the perfect transformation package to suit your needs.

## EXCEPTIONAL VIDEO CONFERENCING EXPERIENCES FOR REMOTE WORKERS

The [Wireless Headset Pro Kit](#) enables your people to tune out distraction for focused, effective meetings, no matter where they're working from. This webcam and headset combo is packed with cutting edge features to help users look their best in any lighting conditions, with 4K resolution and high dynamic range.

And if your workforce is comfortable using their existing or built-in webcams, you can still enhance their experience with the [Wireless Headset](#) alone. Its noise cancelling and voice isolation microphone delivers crisp, clear audio and makes any call sound as rich as it would in person.

## WHAT'S RIGHT FOR MY COMPANY?

Ricoh is here to help at every step of your journey to hybrid working, from consulting on what solutions can deliver the best results for your organisation, to providing on-going, round-the-clock support. It's Ricoh's job to make sure your video conferencing experience stays simple, affordable, and hassle-free, no matter what the future holds.

## BE THE BEST BUSINESS YOU CAN BE

Enabling your staff to communicate, collaborate and connect regardless of location is a crucial part of working life now. And it doesn't have to be a headache any more, with Logitech and Ricoh on your side.

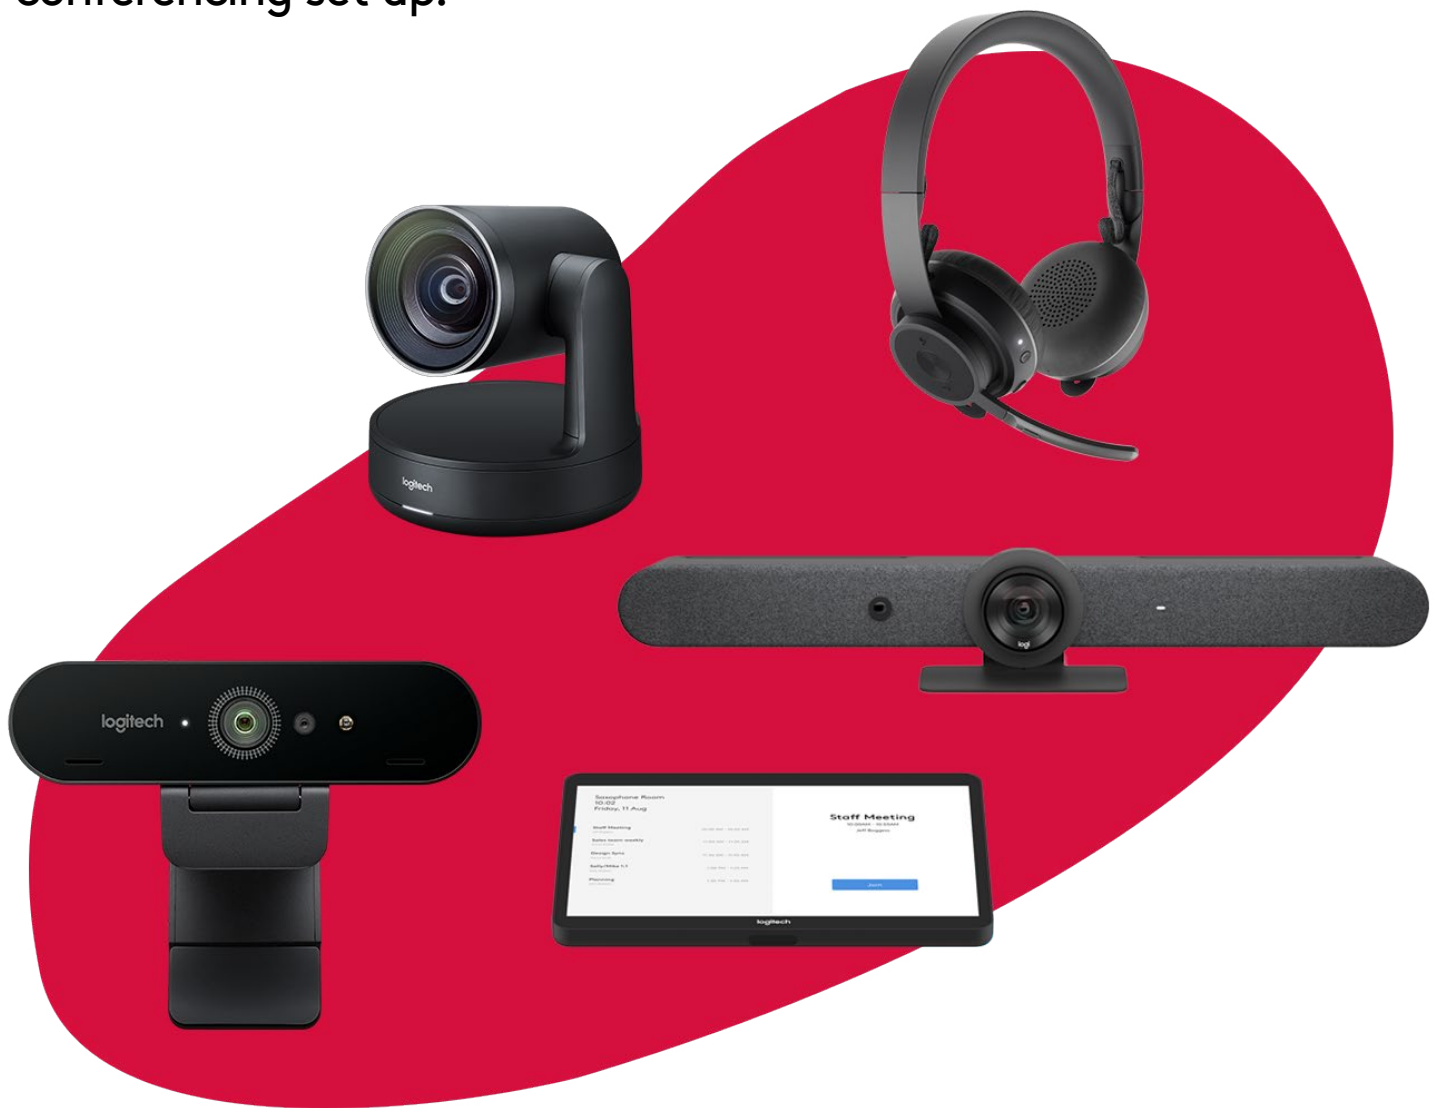

Together, our solutions alleviate all of the communication challenges that a suboptimal video conferencing set-up produces. No more 'Sorry, you cut out a bit there, could you say that again?' No more struggling to present your ideas with the clarity they deserve. And no more hassle trying to configure complicated software and unintuitive hardware.

**Just plug, play and connect.**
